F. OTHER STUNT POSITIONS

CROSS BIKE STAND

Pose Evel Knievel as shown. Place **RIGHT** hand of figure on **RIGHT** handlebar. Place **RIGHT** foot in **LEFT** stirrup. Twist figure slightly forward, bending **LEFT** leg until it is about $\frac{1}{2}$ " off the ground. Launch **BIKE** in normal manner.

BEND
LEG
BACK

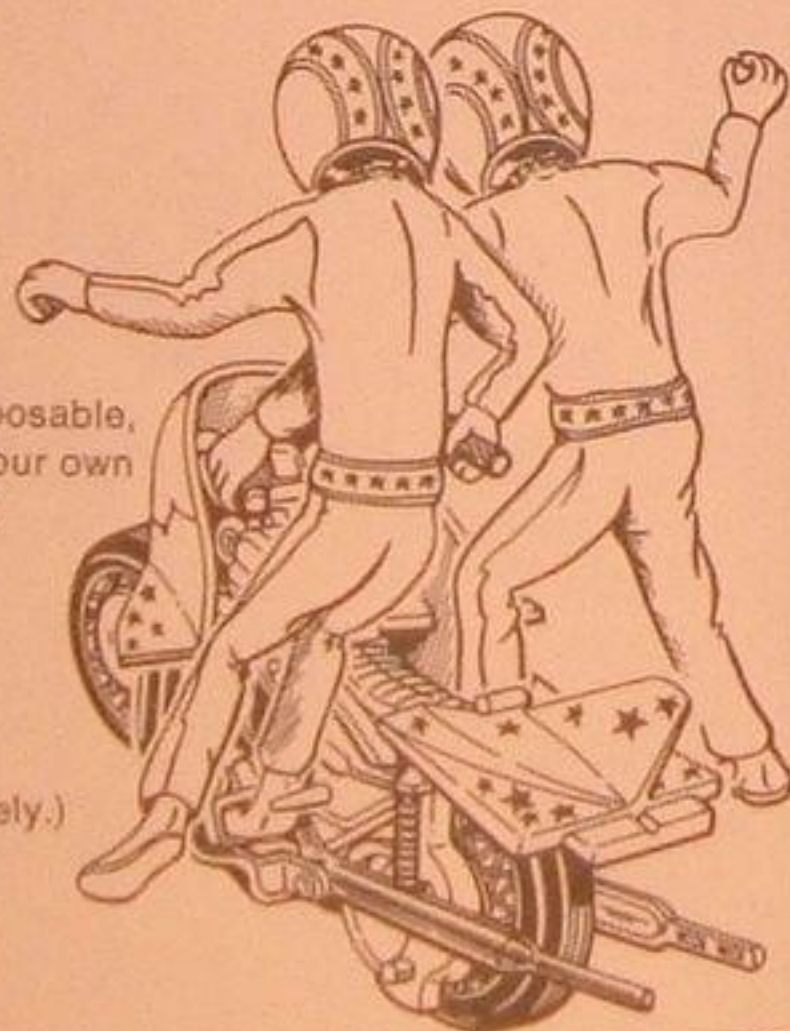

HEADSTANDS

Pose figure as shown. Push hands onto handlebars and position Evel Knievel's head on forward part of saddle. Launch **BIKE** in normal manner.

OTHER TRICK STANDS

Since Evel Knievel is fully posable, you can invent dozens of your own daredevil stunt rides, using Handlebars, Stirrups, etc. You can even have 2 figures ride the Bike in various poses as shown.

(Extra figure sold separately.)

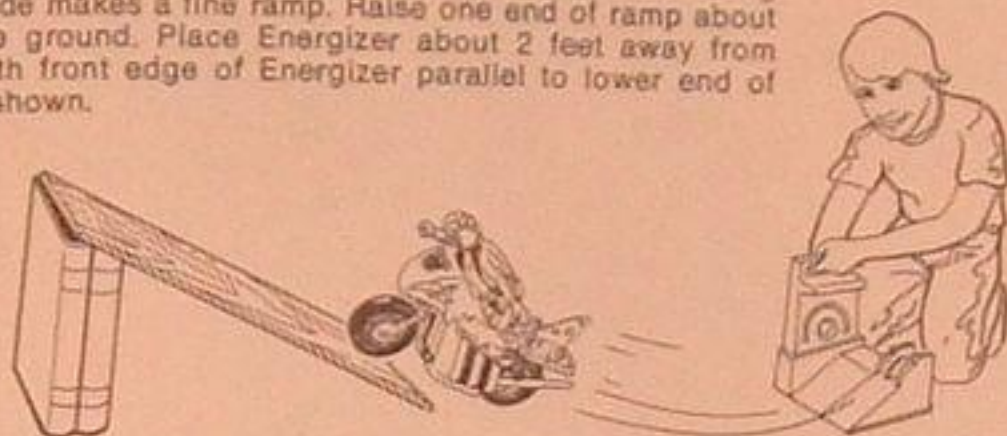

G. FLIPS AND JUMPS

CAUTION

As with all toys that go airborne it is advisable that the flight area be clear of other children and other obstacles. In this way chances of accidental injuries, damaged property and a broken toy can be avoided.

You can make a jump ramp out of various materials found in the home. For example, a piece of $\frac{1}{4}$ " plywood about 18" long by 10" wide makes a fine ramp. Raise one end of ramp about 9" off the ground. Place Energizer about 2 feet away from ramp, with front edge of Energizer parallel to lower end of ramp as shown.

FLIPS—The Mid-Air Flip is one of the most difficult stunts. Choose a ramp that has good traction (for example, rough plywood) and assemble the ramp as shown above. Position the Evel Knievel figure on bike with feet in stirrups and arms stretched out to the sides. Bend the figure forward so that its top half leans over the handlebars. Energize bike at a **VERY FAST** speed. Make sure Energizer is seated firmly on the floor as you turn the handle. When you think the bike is energized enough, **STOP** winding but **HOLD ON TO THE HANDLE** so that it does not move. Bike will launch itself up the ramp and into a Mid-Air Flip.

JUMPS—Seat Evel Knievel figure on bike with hands on handlebars and feet in stirrups. Energize bike and it'll send Evel Knievel soaring through space, land with perfect balance and continue its run.

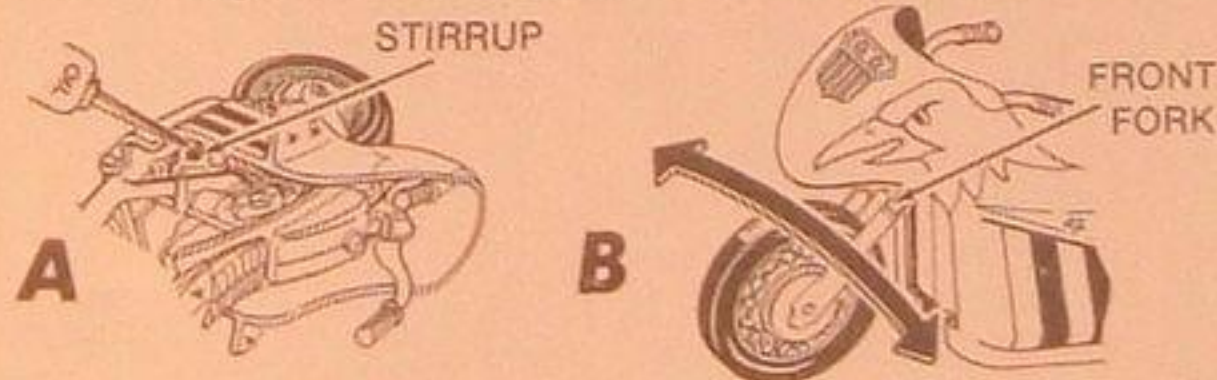

WARNING:

DO NOT use your hand to slow or stop the rear wheel of Strato-cycle while it is spinning. It's best to let cycle run out of power by itself.

TO MAINTAIN THE STRATOCYCLE HI-PERFORMANCE ACTION:

DO NOT RUN STRATOCYCLE ON LONG-FIBER SHAG RUGS, ON SAND, OR ON LOOSELY PACKED DIRT, AS LINT OR PARTICLES MAY COLLECT AND CLOG THE MECHANISM.

- To keep cycle in top running condition, place a drop of lightweight household lubricating oil into **HOLE** under **STIRRUPS** onto **METAL** bearings.
- If Strato-cycle steers too much to the **RIGHT**, restore wheel alignment by giving the front fork a slight twist to the **RIGHT** and releasing. If cycle steers **LEFT**, gently twist front fork slightly to the **LEFT** and release.

For lots more Evel Knievel wild-wheelin' action, look for these exciting items at your local dealer:

- Extra individual fully posable **EVEL KNEIVEL FIGURES**, in your choice of red, white or blue uniform and safety helmet. Perfect for double stunt rides and other action.
- Evel Knievel **CHOPPER**—this mean machine is authentically detailed with a high backrest, dual headlights and four big exhaust pipes. Comes complete with Evel Knievel figure and energizer.
- Evel Knievel **C.B. VAN**—the traveling headquarters features a battery operated message unit in Evel Knievel's own voice! Comes complete with gull wing door, swivel driver's seat, bed, storage area, jump rack and a bike rack that fits all Evel Knievel bikes.
- Evel Knievel **PRECISION MINIATURES**—a set of 12 little accurately scaled stunt vehicles featuring the **STUNT CYCLE, CHOPPER, FORMULA 1 DRAGSTER, CANYON SKY CYCLE, FUNNY CAR, FORMULA 5000, FORMULA "J" CAR, RAT TRAP CAR, SUPER STOCK CAR, DRAG BIKE, STRATOCYCLE, SUPER JET CYCLE.**

STRATO-CYCLE™

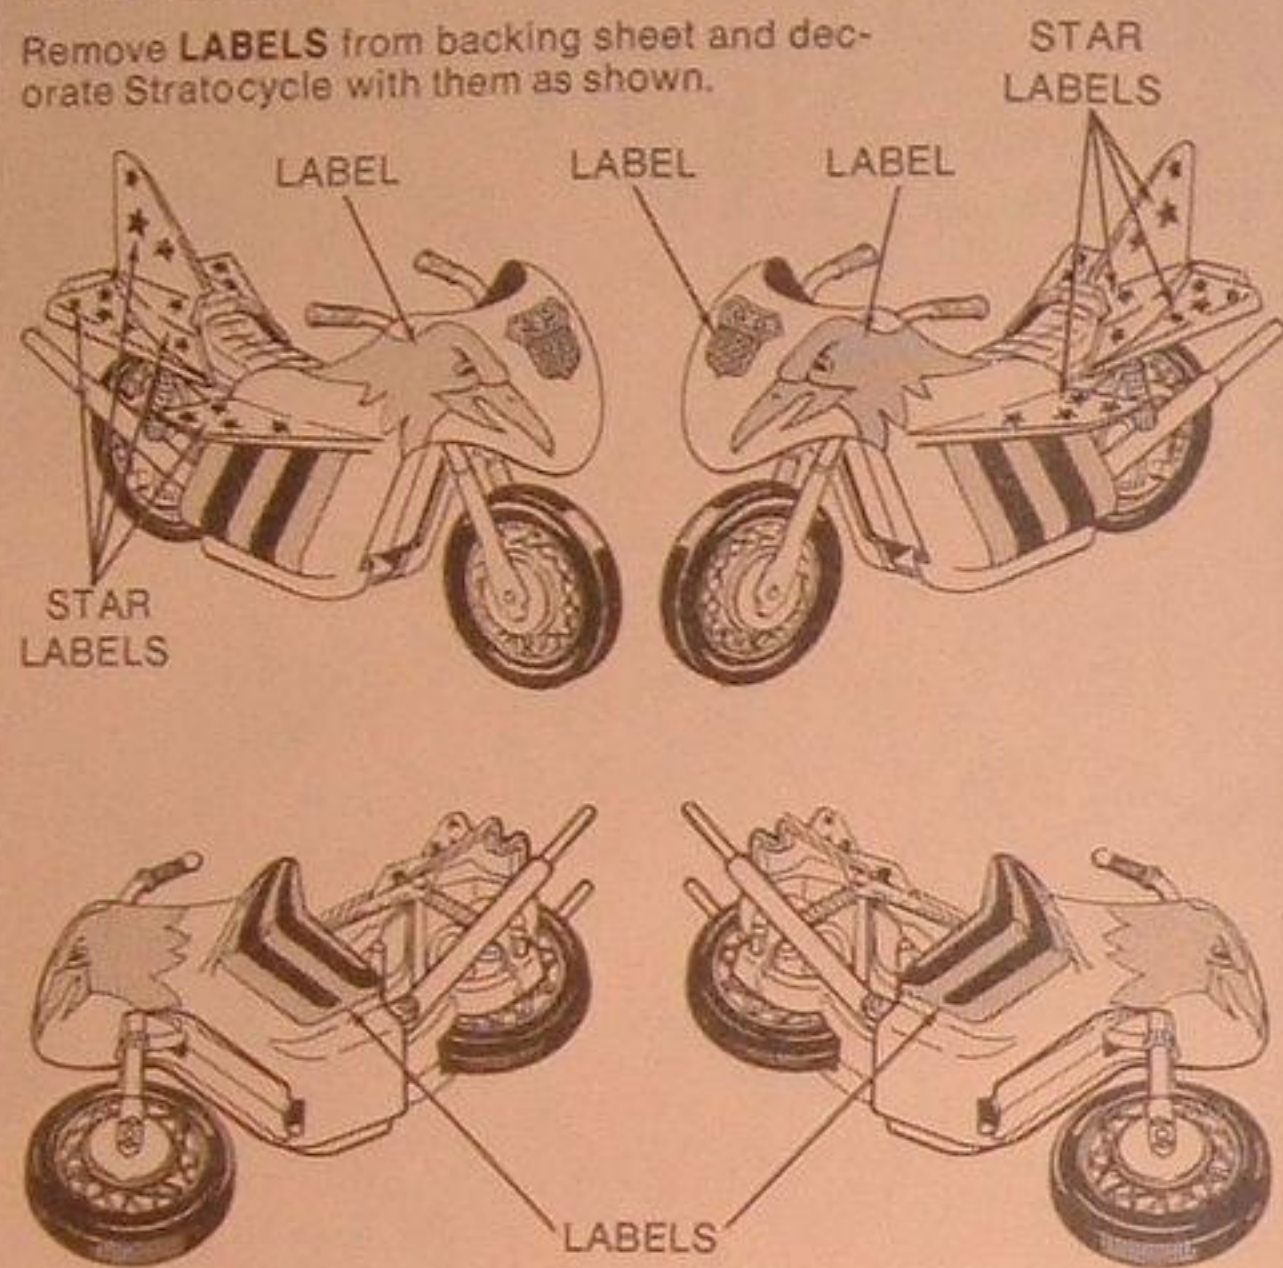

ASSEMBLY AND PLAY INSTRUCTIONS

Evel Knievel—the "King of Stuntmen"! He started racing motorcycles at age 15 and was soon so good that he had to move on to new challenges. He could start a race from the back row, facing in the opposite direction, and still win. So he turned to stunting and earned a reputation as a "terror on wheels"—crashing through fire walls, jumping boxes filled with rattlesnakes, zipping down the landing ramp past leashed mountain lions waiting at the end. Now you can see Evel Knievel in the new motion picture "Viva Knievel" where he is featured performing daredevil stunts on his incredible **STRATOCYCLE!**

It would seem impossible to make a toy that could perform up to Evel Knievel's spectacular standards, but now you can create your own daredevil stunt sensations with the Evel Knievel **STRATOCYCLE**. Your Evel Knievel **STRATOCYCLE** is one of the most amazing toys ever created. It can actually run, jump and stunt on 2 **WHEELS** with **PERFECT BALANCE!** Add the fully posable Evel Knievel Figure in dozens of daredevil stunt positions and you can put on your very own Motorcycle Thrill Show starring the "King of Stuntmen"! The **STRATOCYCLE** features an impact-absorbing front fork that recoils on contact with floor or obstacles to prevent damage to the vehicle. You'll enjoy the wildest stunts on wheels with the Evel Knievel **STRATOCYCLE**.

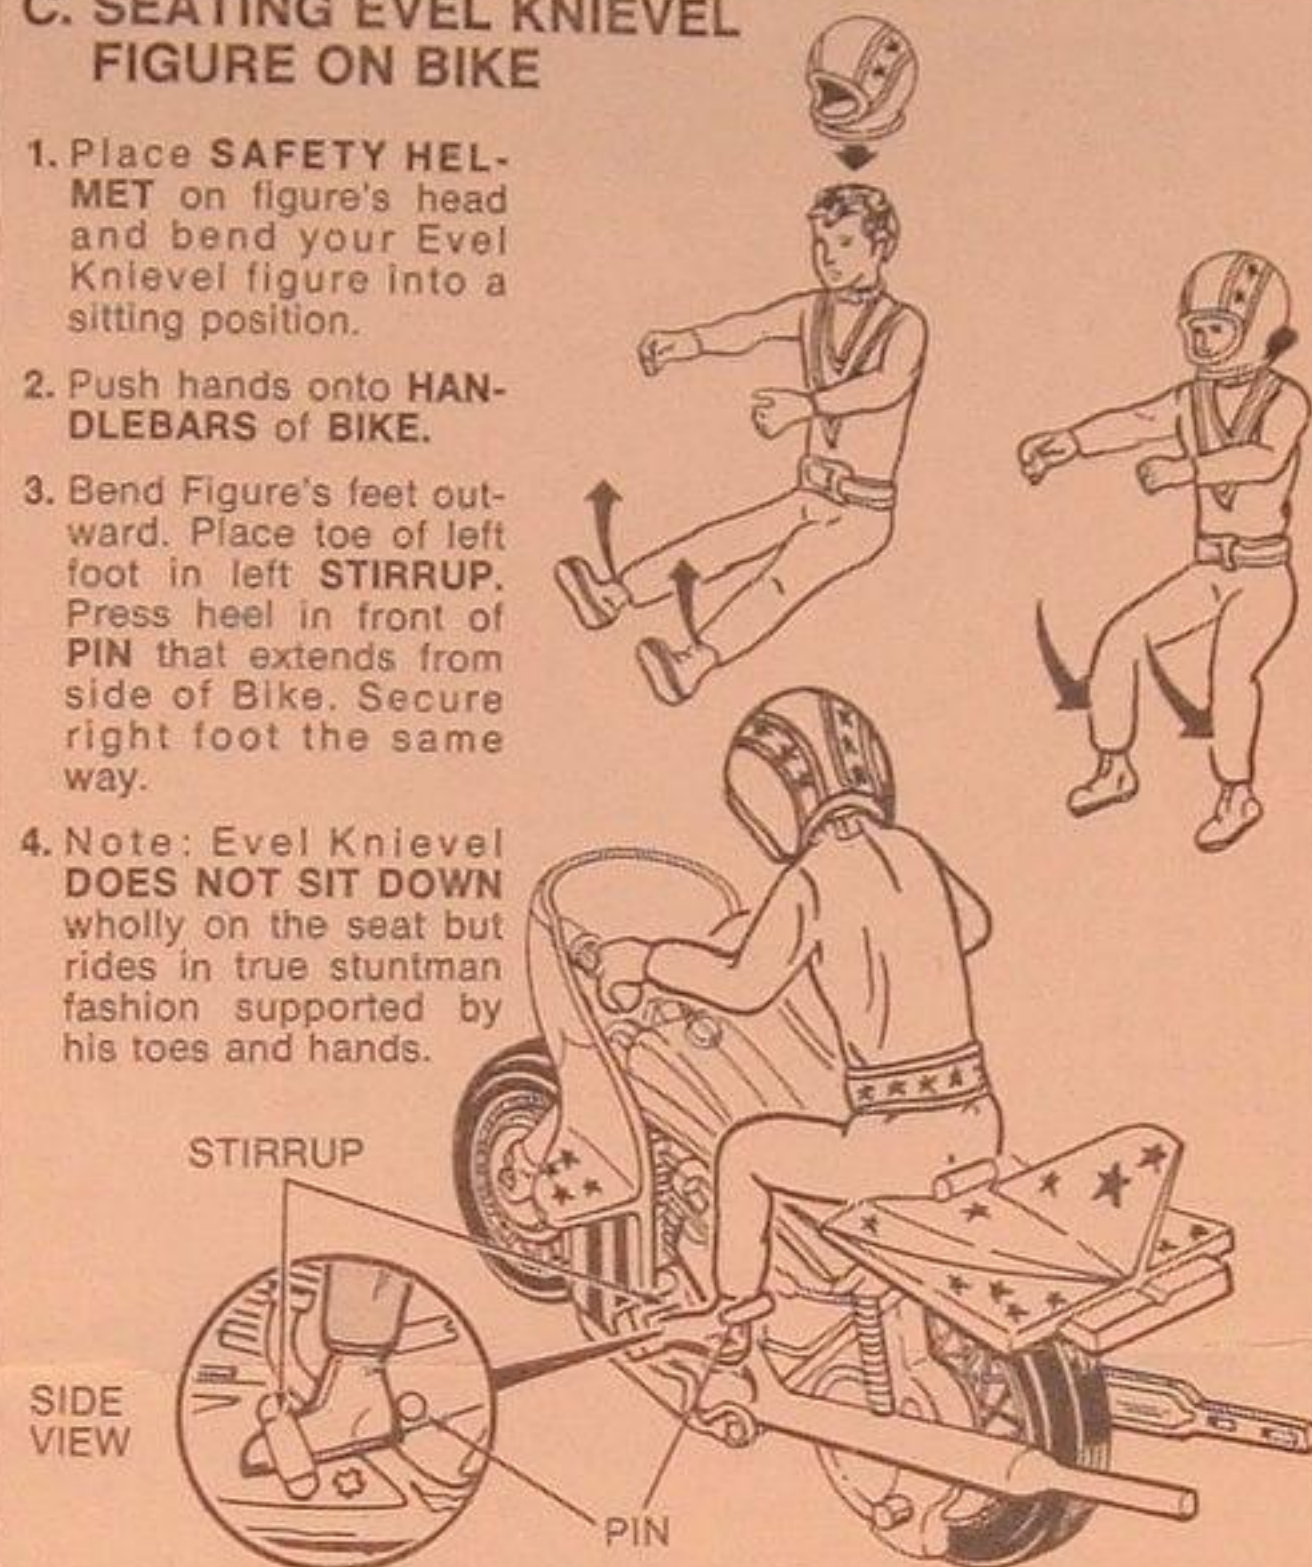

A. LABELS

Remove **LABELS** from backing sheet and decorate Stratocycle with them as shown.

C. SEATING EVEL KNEIVEL FIGURE ON BIKE

1. Place **SAFETY HELMET** on figure's head and bend your Evel Knievel figure into a sitting position.
2. Push hands onto **HANDLEBARS** of BIKE.
3. Bend Figure's feet outward. Place toe of left foot in left **STIRRUP**. Press heel in front of **PIN** that extends from side of Bike. Secure right foot the same way.
4. Note: Evel Knievel **DOES NOT SIT DOWN** wholly on the seat but rides in true stuntman fashion supported by his toes and hands.

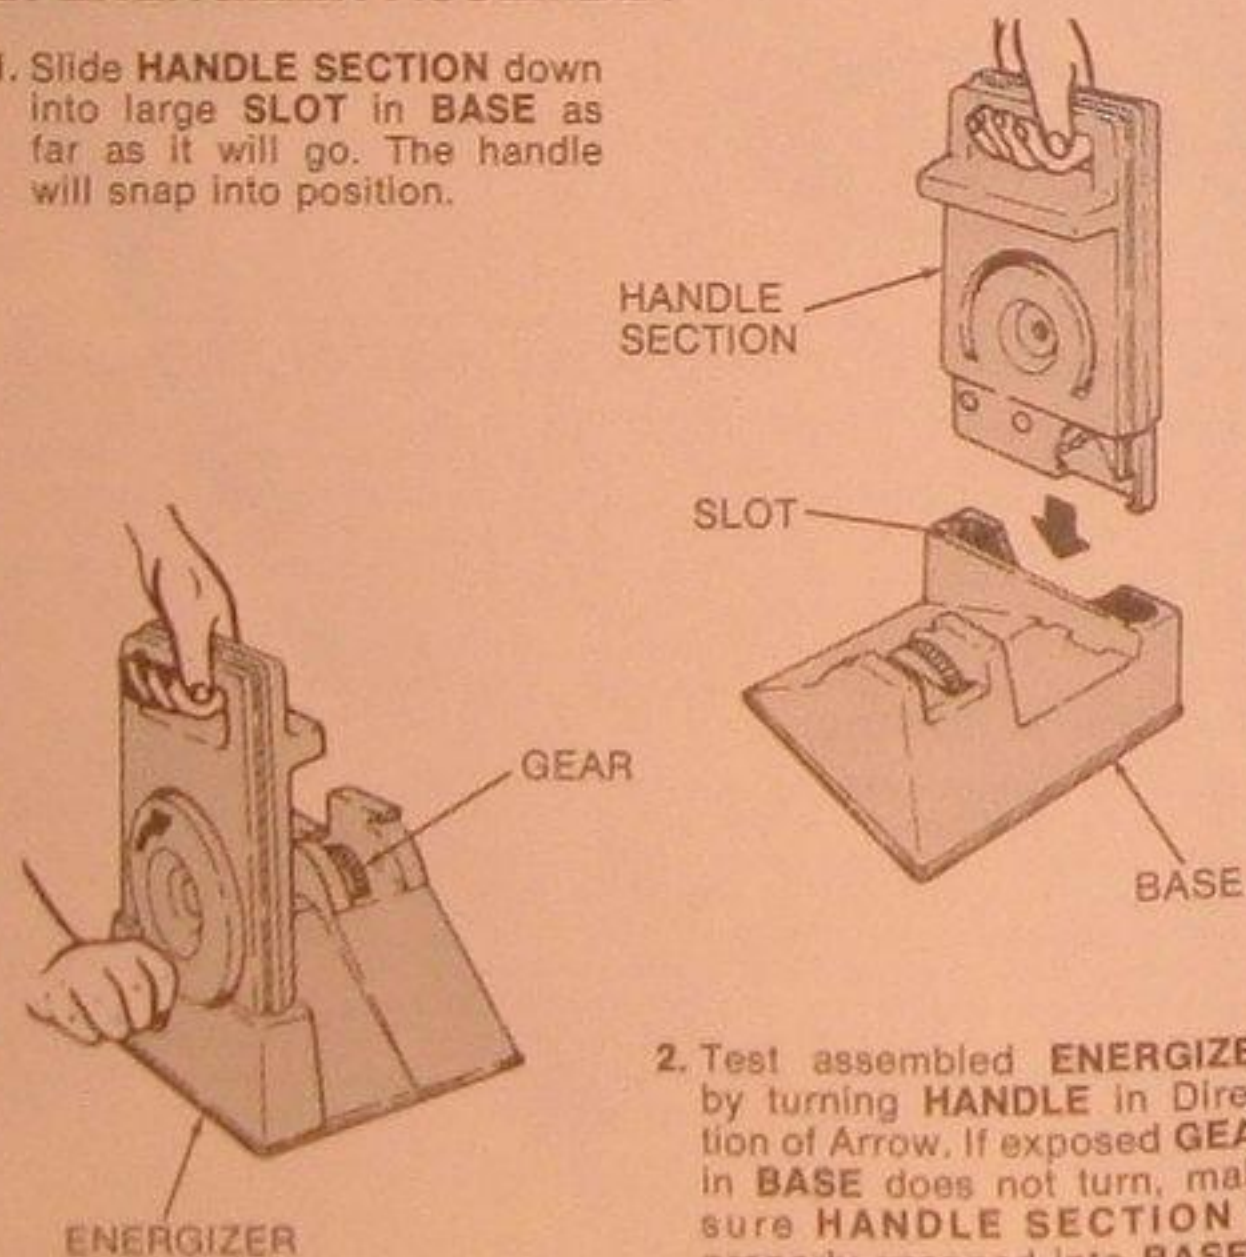

D. ENERGIZING STRATOCYCLE (CONT'D)

3. Turn handle in direction of arrow on Energizer. **START SLOWLY** then wind faster and faster, with constant pressure on the handle. When you think Stratocycle is energized enough (you'll learn to judge by the increasing pitch of its sound) **STOP** winding but hold onto handle. Stratocycle will automatically launch itself from Energizer. Seven to ten turns of the Energizer handle is plenty.

B. ENERGIZER ASSEMBLY

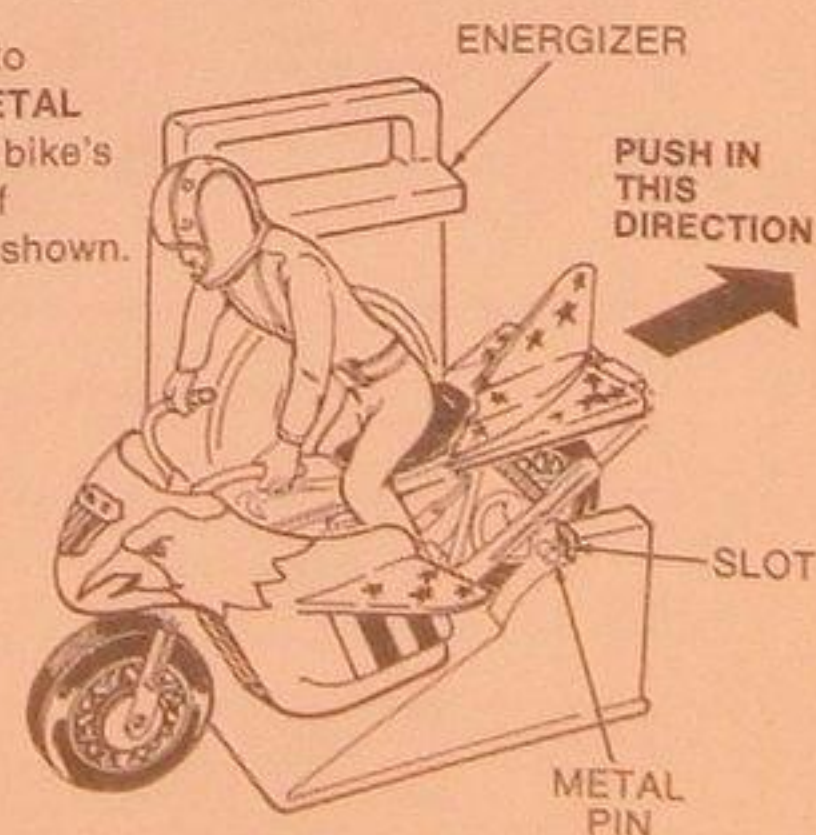

1. Slide **HANDLE SECTION** down into large **SLOT** in **BASE** as far as it will go. The handle will snap into position.

2. Test assembled **ENERGIZER** by turning **HANDLE** in Direction of Arrow. If exposed **GEAR** in **BASE** does not turn, make sure **HANDLE SECTION** is properly snapped into **BASE**.

D. ENERGIZING STRATOCYCLE

1. Pick an area that is fairly free of obstruction, such as a driveway, parking lot, playroom, etc. The Stratocycle travels far and fast—so give it room to give its best performance.
2. Place Stratocycle onto **ENERGIZER**, with **METAL PINS** on each side of bike's rear wheel in **SLOT** of **ENERGIZER** base as shown.

E. TO DO WHEELIES

1. Position Evel Knievel figure as shown—as far back on bike as possible, but keeping his hands on handlebars and feet in stirrups.

2. Place Bike on Energizer and wind until sound reaches a very high pitch. **STOP** winding but hold onto handle. Bike will launch automatically and actually rear up on its back tire in a fantastic wheelie start.

NOTE: It takes practice to learn just the right speed and proper positioning of the rider to make bike do a wheelie. On rugs, winding to extra-high speed may be necessary; however, on asphalt driveways and concrete walks less winding is necessary, and you may have to position Evel Knievel figure further forward to prevent cycle from flipping over as it launches from the Energizer.
